# CRIMP TAKEN IN STOCK BOOM

Excitement, Smaller Crowds and Easier Prices Ruled Yesterday.

There was not nearly so much of a crush at the mining exchange yesterday as there has been for the past ten days, and, while trading is lively and prices strong, it certainly looks as though the backbone of the boom in Sioux Consolidated and some of the others had been twisted a little. Brokers who have been going night and day for two weeks welcome the change or the lull, declaring that disaster would have certainly followed a much longer continuance of the high-pressure dealing. Interest is being shifted to other stocks than those which have held the boards exclusively, and that is counted as a favorable sign of have held the boards exclusively, and that is counted as a favorable sign of continued good business, without the hair-raising and nerve-shattering trimmings that have embellished life on the floor since the "compressor broke" at Drom, H'mp.

the Sioux Consolidated.

Iron Blossom looked in the morning as though it would decline to \$2. It opened at \$2.25, but soon rallled and closed around the \$2.65 mark. There was nothing sensational in the performances of Sioux Consolidated; in fact, it fluctuated less than on any day for a week past, with \$1.20 as the high mark of the day. Black Jack ruled a few cents lower, and Utah Consolidated of Tintic was also off a point or two. Ajax is climbing to beat the band, and Silver Shield, on the the Sioux Consolidated.

## COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment May Day of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald:

Boston, June 10.—Amalgamated was the strongest feature today and stock is very scarce. No one seems to be able to account for the strength, but it moves up easily on mysterious buying. The floating stock of Greene Cananea at 10 is all cleaned up and we expect to see a sharp rally to 14 or 15. North Butte closed 67 bid and a little buying now will put it to 70. Copper Range is as scarce and hard to buy as Wolverine.

# Driving a Stevens-Duryea Light Six

Means absolute ease of control and manipulation. You will not be all tired out at night even after steering a STEVENS-DURYEA for 100 to 200 miles a day. Shifting gears, constant alertness

and manipulation required in highpower (over forty-horsepower) 4-eylinder cars causes strain, exhaustion and that "very tired feeling." forget the pleasures of your ride when physically worn out.

Compare the effects, at the end of the day's trip, of a ride in a highpowered 4-cylinder car, as contrasted with a STEVENS-DURYEA Light Stevens-Duryea Cars have an envia-

ble record of achievement behind at \$2.65. Arrange for a demonstration and obtain full particulars from

Tom Botterill Automobile Co. 62-64 West Third South St. Manufactured by Stevens-Duryea

Company,

Chiconee Falls, Mass., U. S. A.

strength of new stories, is considerably stronger. So is Carisa, on account of its proximity to Sioux Consolidated and Iron Blossom, while Crown Point, with reports of favorable looking ground being entered, is also showing up well. The market is a good one and there are all kinds of chances to make money in it. During the two regular and open board calls a total of 240,788 shares of stock, with a selling value of \$147,684.25, changed hands. Following is the list of final quotations and record of sales made during the day: POWER DRILLS

5			npressor		
_	int	o Co	mmission	at Be	av-
-		er	County	Mine.	

The new compressor plant and power drills at the Indian Queen company's property in Beaver county went into comproperty in Beaver county went into com-mission yesterday noon, when the elec-tric current was turned on, and the work of pushing the tunnel will now be ac-complished at a much faster clip than was possible by the "armstrong" method of drilling. David Evans, manager of the property, who has been giving his atten-tion to matters at the Indian Queen and the liber properties, for the past two the Ibex properties for the past two weeks, states that the new plant is a splendid one and that a period of a few months now is counted upon to bring substantial results in the matter of opening up ore. The tunnel, already well in to-ward the 600-foot mark, is being driven along what is considered about the finest looking mineralized contact in Beaver county. Already cross-fissures have been cut which show high values in gold, silver and other metals, though the developed and proven portion of the company's domain, for which the tunnel is headed,

is a long way ahead yet. At the Ibex, in the old Drum district, Manager Evans reports that development is progressing in a rather desultory fashion, but with substantial results as far as the opening up of ore bodies is concerned. By and by this property will be equipped for heavier work and when matters shape around right it will not take long to inaugurate the campaign of production and money-making.

## SWANSEA CON. AND ALEXIS FILE THEIR ARTICLES

Provo, June 10.—Articles of incorpora-tion of the Swansea Consolidated Mining company have been filed with the county clerk. Provo is the principal place of business. The capital stock is \$100,000, in shares of the par value of 10 cents each. The company takes over the properties formerly owned by the Swansea and the South Swansea mining companies. The South Swansea mining companies. The following are the directors and officers: Jesse Knight, president; J. M., Wheeler, vice president; R. E. Allen, secretary and treasurer; W. Lester Mangum and R. E. Allen.

The Alexis Mining company has filed articles of incorporation. Provo is the principal place of business. The capital stock is \$50,000, divided into shares of the par value of 10 cents each, based on the valuation of the following properties, situated in the Tintic mining district, viz.: The Climax Triangle lode, Extension and Tenderfoot No. 2. The following are the directors and officers: John Bestelmeyer, Bachman is secretary and treasurer. Black Jack, 200 at 86c, 100 at 85c, 200 at 84c, 600 at 83c, 1,200 at 82c, 700 at 82c, 1,000

Roasters at the McGill Plant

—Second Unit of Mill

Ready to Start Ready to Start.

The reverberatory furnaces at the melter will receive the first charges of smelter will receive the first charges of ore from the roasters some day this week, as they were fired up last week for the purpose of thoroughly drying them out, says the Ely Expositor. At the converter the electric traveling

crane has been tested and found to work satisfactorily, and that part of the plant is in shape to receive the product from the reverberatory and blast furnaces and turn out copper 99.5 per cent pure. This will probably be sent to New Jersey re-fineries, where the gold values will be extracted, which are expected to average near 50 cents from each ton of crude ore

sent to the concentrator In the concentrator.

In the concentrator building the second unit will be completed within a couple of weeks and will immediately be put to work handling ore from the Flat and Veteran. One set of rolls has been run some to crush silica during the past few days and the motors have been tested with a streng coursel of the builde. with a strong current of the juice.
The line from the power house generators to the concentrator is one mile long and will carry a current of 13,000 volts to operate the various crushers, rolls and tables that extract the mineral contents

## RAVEN CO. REORGANIZED.

Filing of Papers Recalls Scandal Attending Opening of Reservation.

The filing of copies of the articles of incorporation of the Raven Mining company with the secretary of state Tuesday, calls to mind the scandal in congressional circles which preceded and followed the opening of the Uintah Indian reservation a few years ago and, while there is nothing in the reorganization papers to show what really happened to the old com-pany, it is supposed here that somebody, president; George N. Lawrence, vice president; George N. Lawrence, vice president; Alexander Hedquist, John M. Bestelmeyer and N. A. Robertson. Felix hind the original company are now in full and complete possession of the old com-pany's holdings.

Before the opening of the reservation the Florence and Raven companies had gobbled up the chief gilsonite and elaterite deposits and so powerful was the combinations behind the schemes, and so congress become, that it was impossible but it availed nothing. The real men behind the business are believed to have never become openly connected with the fraud, but they wielded such an influence in legislative circles at Washing-ton, that they had to be taken care of before the reservation opening scheme could be carried through.

Now that the original Raven company has gone out of business and its successor has organized under the laws of New Jersey, as stated yesterday, the pre-sumption is that it will get busy and be-

the rich chute heretofore disclosed in the shaft. This is a very valuable property, which has attracted so much attention from the strong outcrop which can be traced for several thousand feet on the surface and of which W. F. Snyder is the active director. This gentleman has been in camp during the week and positively says that a twenty-stamp mill will be in active operation within sixty days.

Phenomenal gold values have been secured, not only in the outcrop, but in the deepest workings on these large holdings, and every foot of development has been of material benefit to the shareholders. About twenty-five sets of leasers have

and every foot of development has been of material benefit to the shareholders. About twenty-five sets of leasers have been at work on the property for the past sixty days, and every one of them is very much pleased with the present showing.

The Gold Crown estate is located on the richest part of the mineralized zone and is traversed by a network of strong veins, which in surrounding properties are demonstrated to carry exceedingly high gold values, and these values have been maintained wherever the vein has been opened up in the Gold Crown.

Taken altogether, this is a very remarkable proposition and fully warrants the confidence which has been heretofore expressed by all mining engineers who have examined the property. This estate has always been considered a remarkable surface showing and gold values as high as \$10,000 per ton have been secured. While quite a large force of men has been at work on company account, leasers have also been exploiting their sev-

blocked out, some idea may be had of the great value of this proposition.

While the mill mentioned is intended primarily for the reduction of company ores, Mr. Snyder has indicated that he will work ores from any other parts of the camp, in order to assist those in securing returns from their ores, to facilitate continued operations on their part.

It is quite important that this mill be put in at once, from, the fact that ores taken from some of the properties will hardly bear excessive transportation charges, while they will return a very handsome profit when reduced on the ground.

## BLACK JACK DIRECTORS HOLD MONTHLY MEETING

H. G. McMillan was in Provo yesterday morning attending a meeting of the directors of the Black Jack Mining company. Upon his return he was asked what there was to say concerning the reported strike in the Black Jack mine and whether anything of public interest had been done at the meeting.

"There was nothing but routine business transacted at the meeting," said Mr. McMillan "and as regards conditions at McMillan "and as regards as the distance of the latter part of June. Changes may be made in addresses, and new-regards in the latter part of June. Changes may be made in addresses, and new-regards will write or call at the distance of the latter part of June. While quite a large force of men has been at work on company account, leasers have also been exploiting their several blocks of ground, and in the part reserved by the company sufficient high-grade is now exposed to warrant the installation of a mill of large capacity, for the ore extracted by the company alone, and when it is remembered that at least five sets of leasers also have shipping material which is either being sacked or blocked out, some idea may be had of the great value of this proposition.

While the mill mentioned is intended primarily for the reduction of company account, leasers also have shipping column.

The underground survey of the Silver of the The Lieutenant Mining company of Springville yesterday filed articles of incorporation with the secretary of state. The officers are: P. P. Fullmer, president; S. T. Fullmer, vice president; G. W. Mendenhall, secretary and treasurer. The capital stock is \$25,000, with shares at 214 cents each.

The capital stock is \$25,000, with shares at 2½ cents each.

James M. Kennelly, the veteran mining man, has returned from a several days' trip into Nevada mining camps, this time along the Southern Pacific, rather on the line of the San Pedro, through the southern end of the state, where he has numerous interests. "I don't want to be counted as a knocker for any mining region," said Mr. Kennelly yesterday, "but every time I go away from home I become more and more convinced that there is no such mineral country anywhere as
